

The Top 10 Mistakes Embedded Linux Users Make

Joel Isaacson
Ascender Technologies Ltd.

Recently many companies have adopted Linux, for applications that have previously been hosted by RTOS's (Real Time Operating Systems). Linux is quite different than typical RTOS's and designs must be approached differently. This talk will discuss some of the questionable design decisions taken by companies new to Linux and how to avoid these mistakes.

Biography

Joel Isaacson has worked as a independent consultant at the cutting edge of high technology for over 30 years. He concentrates his efforts on consulting and actively developing software. He has been promoting open software solutions for over 15 years. For the last 20 years, he has taught various advanced computer science courses at Bar-Ilan University and has advised tens of students in their advance degree theses. He has a Ph.D. degree in theoretical Physics from the University of Pennsylvania.
